## BOTTOM-LINE VALUE

In today's race for results, actionable information and decision-making capability drive competitive advantage. Our customized Business Intelligence (BI) and Performance Management solutions help you achieve big wins:

- Increased sales and profit
- Reduced cost and staff-hours
- Streamlined business processes
- Enhanced financial visibility
- Improved collaboration and accountability

*"We paid back our first-phase investment in 15 weeks. It was probably the best ROI I'd ever had in my life. It was amazing."*

**Robert Fort, CIO**  
*Virgin Entertainment Group*

*"Analysis Team has the ability to put it all together. They deliver on the technical level and on the business level because they understand both sides so well. This is unique and tremendous."*

**Joan Pohl, Project Manager**  
*Papa John's International*

## SUPERIOR RESULTS

Since 1995, Analysis Team has been delivering Business Intelligence solutions that bring clear results to the bottom line. Our solutions lead to superior, information-based decision making that:

- Aligns operations with corporate strategy
- Directly improves business performance
- Generates sizeable ROI

We have an outstanding record of successful deployments and a very high level of client satisfaction. Respected industry leaders have turned to us to help them leverage their data and realize their vision of improved enterprise performance:

3Com  
 CapitalSource Bank  
 Chiron  
 Clorox  
 Disney  
 E&J Gallo Winery  
 Gap, Inc.  
 iStar Financial  
 Longs Drugs  
 Nestlé  
 Papa John's Pizza  
 Restoration Hardware  
 Seagate Technology  
 Toyota  
 Virgin Entertainment Group

## STRATEGIC SOLUTIONS

### **Strategic Alignment**

Business Intelligence is most effective when linked to corporate strategy. Analysis Team helps clients develop Key Performance Indicators and delivers the tools for management to monitor continuously and respond effectively, assuring corporate goals are achieved.

### **Business Intelligence Roadmapping**

Analysis Team identifies and prioritizes opportunities based on strategic fit and payback potential. Our BI Roadmap focuses efforts to deliver optimal value, addressing business processes, information needs, technology and organizational readiness.

### **Business Intelligence Governance**

Persistent governance keeps BI effective long-term. Analysis Team helps clients define a universal business language, hierarchies and metrics that enable one version of the truth. We provide guidance to put in place the skills and processes to support BI as an ongoing practice.

## TECHNOLOGY DEPLOYMENT SOLUTIONS

### **Business Requirements Analysis**

Successful BI implementations start with a solid understanding of business drivers, processes and information needs. Using well-honed methods, Analysis Team works with clients to define the right solution.

### **Software Selection**

We have the experience and impartiality to guide clients through the process of selecting BI software that best meets current and future business requirements.

### **Solution Design and Deployment**

Analysis Team delivers customized, automated BI solutions that improve analysis, management reporting and planning. Our meticulous deployment practices maximize quality.

### **Training**

Analysis Team facilitates complete knowledge transfer that enables client self-sufficiency. Our training assures user adoption, in-house maintenance, and lower cost of ownership.

## EXCEPTIONAL ABILITY

Analysis Team has decades of combined experience designing and deploying leading BI and Performance Management solutions:

- Oracle Essbase and the Hyperion Enterprise Performance Management Suite
- Microsoft SQL Server, Analysis Services and SharePoint Portal
- Integration with data source systems and strong ETL skills

Comprised of senior-level professionals from both business and technology backgrounds, Analysis Team is set apart by our agility, business insight, and attention to data and design quality. We bring a value proposition that is second to none.
